**Student Accommodation
WiFi Solutions**

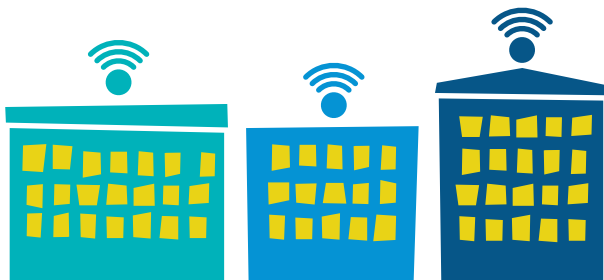

Specialised Hotspot & WiFi Management

With more than 10 years experience in the industry WISH focuses on high density installations of fast broadband internet to multi-tenant buildings using copper, WiFi, or fibre, especially in the student market segment using prepaid WiFi Hotspots to offer students fast affordable connectivity.

8000 Students Daily

WISH currently manage about 8000 WiFi connections daily. The availability of affordable, reliable internet connectivity inside multi-tenant student housing has become a critical success factor and basic minimum service.

National Network Management and Installations

WISH has installed, monitors and manages Wi-Fi networks nationwide at student accommodations. Leveraging of a wide partner network for Internet connectivity and Installations, WISH actively monitors thousands of access points and manages Gbps worth of Internet breakouts spread across Cape Town, Stellenbosch, Port Elizabeth, Bloemfontein, Hatfield, Nelspruit, and Potchefstroom.

Generate Revenue with Existing or New Builds

WISH can customise the WiFi offering according to the client's needs, any new building or taking over existing installs.

Flexible WiFi models – own and participate with earning potential or we manage on your behalf.
